

STAINLESS STEEL OUTDOOR SHOWERS **Floor-Mounted Outdoor Showers**

Material Description

The Floor-Mounted Outdoor Shower consists of Type 304 Stainless Steel Construction with a matte finish design that is Rust-Proof and Resistant to harsh environments.

The Base of the shower is a 6" x 6" stainless steel flanged base plate to be mounted to the floor. The unit is supplied with four (4) stainless steel anchoring bolts. A stainless steel escutcheon plate is supplied to cover the anchoring system for safety and aesthetic purposes.

Valves and Shower Heads

The Floor-(or Deck)-Mounted Outdoor Shower valves are solid brass with heavy chrome plating. Standard valves are cross handle star configuration valves. Commercial and Public Facilities that require ADA (Americans with Disabilities Act) standards, an ADA compliant adjustable metering valve is available. ADA Valves are Push-Button Activated and Slow Closing. Shower sprays water for approximately 12 to 30 seconds, and then shuts off automatically.

The shower head and hose bib are constructed of solid brass with heavy chrome plating. The water supply inlet is standard one-half (1/2) inch female pipe thread located at the bottom side of the unit, above grade. The cover plate hides this water inlet. The hose bib is standard 1/2" with vacuum breaker.
